

GAMES WORKSHOP

SPECIALIST GAMES & CLASSIC RANGE CATALOG

2005-2006 EDITION

What You'll Find Inside

The Specialist Range is made up of all the available Specialist Games and their model ranges, including those for the Battlefleet Gothic, Blood Bowl, Inquisitor, Mordheim, Necromunda, Warmaster, and Epic 40,000 games.

The Classic Range consists of Classic and Collector's models and bitz for Warhammer 40,000 and Warhammer.

CLASSIC RANGE

In All Their Forms

Games Workshop sells its models unpainted in boxed sets, in blister packs, and as component parts. Throughout the catalog, models are shown assembled, usually painted, and on their appropriate bases.

Most gamers, painters, and collectors will want to buy whole models, but some hobbyists will want to purchase the separate parts for conversion and modeling purposes. At times, only the individual bitz or the complete models are available. This fact will be noted where appropriate.

Codes and Price Lists

Codes identify each product, and these codes will match up with the price list. All blisters, boxes, bitz, and sprues shown in each section will have their prices listed in the appropriate section of the price list.

Where Is This Stuff Available?

All of the products in the catalog are available from participating Independent Retail shops (often called Rogue Traders), Games Workshop Hobby Centers, and the GW Mail Order Service. **Remember, bitz are now available in all Hobby Centers!**

SPECIALIST GAMES RANGE

Specialist Games is a division of Games Workshop that produces its own line of games, gaming supplements, miniatures, and magazines. In addition to showing off some of the awesome model ranges, this section explains what the Specialist Games division is all about, how you can get the models, and how to find out more.

What Games Are in the Specialist Games Range?

The Specialist Games range includes miniatures and materials for Battlefleet Gothic, Blood Bowl, Epic 40,000, Inquisitor, Mordheim, Necromunda, and Warmaster.

Why Was the Specialist Games Division Set up?

The success of the main Games Workshop games – Warhammer, Warhammer 40,000, and The Lord of The Rings – has made it difficult for the main Games Workshop design studio to provide support for the other fantastic gaming systems that Games Workshop has produced over the years. The Specialist Games branch is dedicated to supporting these fine additions to the Games Workshop gaming worlds.

Keep Tabs on What's Going on with Specialist Games

The best way to stay on top of all the happenings and releases for Specialist Games is to keep an eye on the Specialist Games web site, which can be found at:

www.specialist-games.com

This web site is a must-see for fans of any of the Specialist Games ranges. This is a great place, in addition to *White Dwarf*, to see new releases and upcoming new supplements.

How Can I Get My Hands on All That Great Specialist Games Stuff?

The entire range of Specialist Games is available via special order from:

- ANY participating Independent Retailer
- ANY Games Workshop Hobby Center
- Through Games Workshop Direct Services' Mail Order
- The Games Workshop Online Store

Thus, if you want any Specialist Game, model, bit, or supplement, you can get it. Just ask the staff of your favorite store how to place the order.

You Can Contribute!!!

The support for Specialist Games is written for fanatical GW gamers and by fanatical GW gamers. If you (yes, YOU!) are really enthusiastic about a Specialist Game, then why not submit some work? A contributions link on the Specialist Games web site details the information that freelancers require.

Above: High Elves clash with the Undead in a sweeping battle of Warmaster.

Bottom (L to R): An Eldar Titan prepares for attack from an Ork Squiggoth in *Epic*, Dwarfs and Men skirmish over the dangerous riches held in the city of Mordheim, and Amazons face off against Lizardmen on the pitch in a deadly game of Blood Bowl.

BATTLEFLEET GOTHIC™

SPACESHIP BATTLES IN THE 41ST MILLENNIUM

In the void of space, massive battlefleets pierce the darkness to enforce the will of the Emperor. Vast warships maneuver and fire at each other; fighters and bombers are launched in waves; and torpedoes race toward their targets.

There is no peace among the stars. Battlefleet Gothic allows you to command fleets of warships in deadly conflict in the voids of space. The Gothic war was a grim time when the Imperium of Mankind battled for survival in the hostile depths of space. The system was plagued by Ork Pirates, Eldar Corsairs, and the most dangerous foe of all...Chaos.

The original Battlefleet Gothic game came with rules for four fleets – Imperial, Chaos, Orks, and Eldar. Since that time, we have made rules and models for Necrons, Tau, Space Marines, Dark Eldar, and other space phenomenon like mines and more.

Above: Ty Finocchiaro's Slaughter Class Cruiser has most definitely felt the tender mercies of Nurgle.

Below: Jake Landis used colored translucent plastic rod to carry the look of the 40K-scale Necrons into the Battlefleet Gothic Necron fleet.

Above: The Retribution Class Battleship, which uses pieces from Epic Titans, is the handiwork of Chad Mierzwa.

Choosing Your Own Fleet

As a potential new Admiral about to embark on a mission to conquer the galaxy, it is essential to decide which fleet you want to command. Some Commanders choose a fleet based on what Warhammer 40,000 army they already own, while others may base a decision on the looks and "paint-ability" of the ships. For the more tactically minded, here is a quick rundown on the general strategies behind each type of fleet.

Imperial Fleets. In general, it seems as if Imperial powers favor armor and long-ranged striking power over sheer speed. Almost all Cruisers and Battleships have massively armored prows that can absorb mighty punishment, and when you add in the fearsome Nova Cannon, you get a blend of longevity and firepower.

Chaos Fleets. These are largely constructed of older versions of Imperial ships that defected during the Heresy. Chaos tends toward faster ships with shorter ranged weaponry. Thus, it is imperative for a Traitor Fleet to close quickly and unleash its potent weaponry point blank.

Eldar Fleets. The Eldar are hit-and-run specialists that use superior speed and maneuverability. While Eldar ships can dish it out, they are not particularly sturdy nor do they hold up well under sustained heavy fire.

Ork Fleets. As one might expect, Orks are not subtle. They prefer by far to rush headlong at any enemy they can find. Though rusty, neglected, and ill-kempt (at best), Ork ships are loaded with weapons!

Space Marines. While launching quick striking operations is their strong suit, Space Marine fleets are formidable all on their own. The Battle Barge is not to be lightly regarded (especially at close range), and before a foe knows it, wave after wave of Thunderhawks are streaking toward his fleet!

Necrons. These mysterious aliens have more bizarre, arcane weapon systems than any other fleet. Multidirectional lightning arcs and reactive hulls are just a few of the technologically advanced items at a Necron admiral's disposal.

Tyranids. The Tyranid fleets are a terror up close. These completely biological vessels are in essence huge creatures floating through the depths of space. While most of their weaponry is close ranged, the horrible ships also have claws, tentacles, and appendages that can make attacks should any foe approach too close.

Dark Eldar. The Dark Eldar are raiders and slave merchants. Just like the beings who crew them, Dark Eldar ships are wicked and hard-hitting. Fast like their goodly brethren, the Dark Eldar ships do much better on the speedy assault than in defense.

GETTING STARTED

Battlefleet Gothic Boxed Set (60010899001)

- Battlefleet Gothic rulebook with campaign rules
- 4 Imperial cruisers (multi-part kits)
- 4 Chaos cruisers (multi-part kits)
- 12 assorted dice
- Fleet Registry roster pad
- 2 plastic range rulers
- Over 100 game counters
- Two reference sheets
- Getting Started guide with exclusive comic strip

Battlefleet Gothic: Armada (60710899022)

Battlefleet Gothic: Armada is a supplement to the Battlefleet Gothic game that adds new rules, ship profiles, and fleet lists for many of the most important spacefaring races of the 41st millennium. This book includes more than 48 new ship classes, plus complete fleet lists for a number of army types. In addition, *Armada* covers two of the greatest wars the galaxy has ever witnessed and provides new background, maps, and campaign rules for these conflicts.

THE BATTLE OF FIVE ARMIES™

Years before Frodo joined the Fellowship on its great quest, his Uncle Bilbo was present at another pivotal battle in Middle-earth's history – The Battle of Five Armies, where Men, Elves, and Dwarves formed a reluctant alliance against the Wargs and Goblins led by the evil Bolg. There were others present at this battle, such as Gandalf the Grey, the great Beorn, and the majestic Eagles, and they played a pivotal part in the outcome. Now, you can also take part in the famous battle from J. R. R. Tolkien's classic book *The Hobbit*.

The Battle of Five Armies game re-creates the climactic battle from J. R. R. Tolkien's *The Hobbit*. In the game, players take command of rival armies of Men, Elves, Dwarves, Goblins, and Wargs represented by ranks of intricately detailed models about 10 mm tall. Dice are employed to resolve the effectiveness of moves as well as the result of shooting and hand-to-hand fighting. The Battle of Five Armies is a game of grand strategy in which generals must balance caution and daring in pursuit of victory.

BLOOD BOWL

THE GAME OF FANTASY FOOTBALL

"Good evening sports fans! This is your match commentator tonight, Jim Johnson, and welcome to the 2005 Blood Bowl Catalog, the essential program and information source for all self-respecting Blood Bowl fans."

"Crammed full of player and team information, this section of the catalog contains pictures of all the Blood Bowl league teams from Undead to Humans, Chaos to Wood Elves. There are also detailed pictures of all the players on the teams. Who knows, with a little training you could be here in a few years' time fighting for the right to hold aloft the coveted Blood Bowl Trophy!

Let's turn it over to my partner, Bob. Bob?"

"Yes, thanks Jim. Well good evening, and

are you folks in for a great night of top-class sporting entertainment! You could be here too if you can drive your team hard enough on the training ground."

"I'm going to have to interrupt you there, Bob, as the teams have just taken to the pitch to warm up for this final. Both teams are looking very fit and hungry for this cup – so we're certainly in for an exciting game! Kickoff is about 5 minutes away. For those of you at home who are unfamiliar with the rules, we've got just enough time to run through the basics before the match starts. Jim?"

"Blood Bowl is an epic conflict between two teams of heavily armed and quite insane warriors. Players pass, throw, or run with the ball (and sometimes ignore it altogether and simply pummel the opposition into the ground) in the attempt to get it into the other end of the field, the End Zone. Of course, the other team must try to stop the opposition and recover the ball. If a team gets the ball over the line into the opponent's End Zone, it's called a touchdown; the team that scores the most by the end of the match wins the game! The team that wins tonight will be the Blood Bowl Champions of the season. But that's an awful long way away at the moment, as the players are about to square up and get this final underway!"

*Above: Chris Blair's Dark Elf team,
Below: Saturday on the Terraces by Neil Langdown.*

Above: Having played Blood Bowl for a good many years, Glen Robinson has coached a fair few teams. However, his favorite and most successful are the Averland Avengers.

Glen: I have ultimately found that the variety of players and the good all-around skills make humans an excellent team, and I set about collecting a characterful and unique team for myself. I knew I wanted to represent each model available to a Blood Bowl team accurately, and that included the head coach, wizard, assistant coaches, and of course, the cheerleaders. Over the many years of coaching, tactics on the training ground have been refined and tweaked numerous times, and the team now has a play to suit each opponent, be it absorbing damage off the hard-hitting teams like Chaos and Undead or keeping up with and containing the fast and the more agile teams in the league, such as Wood Elves.

GETTING STARTED

Getting started with Blood Bowl couldn't be easier. Just head to www.specialist-games.com/bloodbowl and download the "Living Rulebook". Reading through this book and rummaging around in the Specialist Games website will give you endless hours of great hobby fun.

**EPIC**

EPIC

Epic brings futuristic combat to your tabletop on a whole new scale, as large companies of troops do battle among legions of the most powerful and gigantic weapons of war ever to blast their opponents to oblivion! Towering war machines stride their way across the battlefield and fire incredibly powerful weapons. Around the feet of these giant war machines, huge tanks and artillery pieces batter each other into molten scrap metal. Companies of infantrymen fight and die amid the ruined landscape, while lightning-fast aircraft make strafing runs across objectives below.

The Epic rules allow players to fight battles with Epic-scale models (figures about 6 or 7 mm tall represent a man-sized creature). This fantastic scale allows access to the full spectrum of units and all manner of war machines available to a futuristic commander or warlord. Where a game of Warhammer 40,000 might have a few tanks per side, the size of Epic allows each player to control dozens upon dozens of such vehicles of destruction. You'll need that kind of firepower to take on the enemy! Mighty Titans, immense war machines the size of skyscrapers, stride into the fray. Flyers streak overhead, and squads of infantry hole up in cover to offer support or launch assaults to swarm over enemy armor. The game is all about artillery barrages, swift scouting vehicles, and the kinds of battles that any gamer would truly deem EPIC.

GETTING STARTED

Epic: Armageddon
60710399017

Epic: Armageddon contains rules for playing games set in the 41st millennium in Epic scale. In addition, the book has historical background, scenarios, and gaming advice about the Imperial world of Armageddon. Army lists for Imperial Guard, Space Marines, and Orks are featured as well.

INQUISITOR

You have been told of the Inquisition, that shadowy organization that defends Mankind and the Emperor from the perils of heresy, possession, alien dominance, and rebellion.

You have been told the Inquisition is the ultimate defense against the phantoms of fear and terror that lurk in the darkness between the stars.

You have been told the Inquisition employs the bright saviors in an eclipse of evil, the purest and most devoted warriors of the Emperor.

You have been told the Inquisition is united in its cause to rid the galaxy of any threat, from without or within.

Everything you have been told is a lie!

For 10,000 years, the forces of the Emperor's Inquisition have fought a secret war to defend humanity from its worst enemies: the alien, the heretic, and the Daemon. But this war is fought as much with hearts and minds as it is with guns and blade. It is a war without mercy that is fought in the dark, forgotten corners of the galaxy.

Welcome to the shadowy world of the Inquisitor! This narrative wargame allows you to play the part of a bold hero or cruel villain in the horrifying universe of the 41st millennium. Each player controls one or more characters who are represented by large-scale miniatures that move and fight over a tabletop battlefield.

This skirmish-level, narrative-driven game adds a whole new level of detail to gaming in the 41st millennium.

The Inquisitor rulebook contains all the rules needed to play as well as a comprehensive armory and details of many special talents, abilities, and psychic powers. Extensive tips and guidance for Games Masters can be found as well as 15 fully detailed sample characters. Inquisitive minds will also find plenty of background for the character types as well as painting and modeling tips. So, for those of you ready for more character and roleplay in your tabletop gaming, Inquisitor is for you.

Inquisitor-Scale Models

Games Workshop has designed an extensive range of Inquisitor models for all of the characters detailed in the Inquisitor rulebook and many more besides. These large-scale models are much bigger

Above: Joe Orteza's Tzeentch Sorcerer won first place in the 2003 Atlanta Golden Demon Open Competition.

than the majority of Citadel Miniatures. Man-sized models in the other GW games are approximately 28 mm high, whereas those for Inquisitor are roughly 54 mm to 60 mm high.

From Imperial agents and aliens to extra weapons and conversion pieces, all the Inquisitor models and codes available can be found on the following pages. For the latest releases, it is worth checking out the "More Games" section on the Games Workshop web site at www.games-workshop.com.

Conversion Ideas

With all the individuality of characters in Inquisitor and the hyper-detailed skirmish rules, many players find themselves doing conversions on their large-scale models. Of course, it is possible to use all the bitz in the Inquisitor range, but cunning converters will be able to find a host of parts throughout the rest of this catalog, especially with large monsters and even some war machines or vehicles!

Left: Sean Thornton's Space Marine won a silver in the 2003 Baltimore Golden Demon Open Competition.

Above: Adeptus Arbites Enforcer by Darren Latham

Above Left: Rick Smith used subtle conversions to the basic Witch Hunter Tyrus model to make Inquisitor Melchia. Above Right: Mark Bedford's unique model using Sergeant Dorian Black and bits from the booster packs (shown later in this section).

Right: This Inquisitor Havoc won Tue Kaas first place at the UK 2001 Golden Demon.

Witch Hunter Tyrus and his retinue prepare for an encounter with underground mutants.

GETTING STARTED

Inquisitor Rulebook
60041399001

Left: All of the rules needed to play the hyper-detailed Inquisitor game can be found in the Inquisitor rulebook. There is also background describing all the different characters you can use in your games of Inquisitor as well as some painting and modeling tips.

Right: This package contains five 6-sided dice with the Inquisitor "I" in place of the single pip on the "1" side of the die, 4 10-sided dice, and 1 scatter die. All dice are pearlized red.

MORDHEIM™

Mordheim, the City of the Damned, is a terrible place of nightmarish ruin, where danger awaits in every shadow. It is here, amid crumbling palaces and twisting streets, that hard-bitten warriors gather to seek out the promise of riches and fame.

The City of the Damned

Mordheim is a dark, atmospheric game set in the troubled history of the Warhammer world. As a player, you control a warband that is out to earn fame and fortune among the devastated ruins of the once-great city of Mordheim, the cursed city. Mordheim is a skirmish game. The rules are similar to Warhammer but add a level of detail not possible when entire armies of figures do battle. A typical warband size is somewhere between six and a dozen figures. Models can climb the ruins, leap off balconies into combat, crouch in shadowy cover, push foes off precipices, stun or knock down enemies, parry, and score critical hits.

Mordheim can be played as a one-off battle in an evening, but where the game really shines is in the campaign rules that allow players to link together an ongoing series of games in which the warbands will develop new skills, hire extra warriors, and gain further fame and notoriety. Be careful as you explore the ruins for new treasures. Rival warbands also scour the city and may be lurking in every shadow.

History of the City of Mordheim

Ages ago, a clear and portentous sight was spotted in the night sky over the large and well-developed Empire city of Mordheim. It was the twin-tailed comet, the very sign of Sigmar, founder and savior of the land.

As the comet burned closer and closer, lighting up the whole night sky above Mordheim, many pilgrims flocked to the city to join the ongoing celebration. Feasts, dances, and much drinking followed, and the revelry soon grew into debauchery and decadence.

But the comet was not a sign of Sigmar's coming but instead the instrument of his judgement. If the impact of the falling meteorite did not instantly slay the city dwellers, the ensuing fires and mysterious vapors soon did.

Eventually, the ruins cooled, and the few survivors who had been just outside the city when the comet hit began to trickle into the still smoking debris in search of salvage and treasures. Strange stories began to circulate about the wondrous and magical shards of glowing stones that could be discovered in the rubble. Credited with powers of healing and more, the glowing stones were named wyrdstone and were highly sought after.

Soon the ruins of Mordheim were being scoured by small warbands from Reikland, Middenheim, and far away Marienburg, but they were not alone. Skaven, man-sized bipedal rats, emerged and sought the glowing stones too, and Chaos worshippers gathered in the gloom. Bands of Undead and the Witch Hunters who sought to burn them entered the ruinous gates. Infamous rogues and mercenary cutthroats made their way toward the riches. More and more warbands from the far corners of the Warhammer world began to take interest in what was at stake. Will you dare to enter Mordheim, the City of the Damned?

Building a Warband

If you are getting started with Mordheim, you will want to play a few individual games and experiment with different warband configurations and equipment. This approach will allow you to learn the rules and to find your "playing style."

On the following pages, you will find the many different models for all the different warbands. Each warband is different, with its own sets of strengths and weaknesses. Most warbands tend to be composed of a leader, perhaps a few other heroes, and a small number of henchmen. However, as funds are tight to hire and equip your warband, it is a wise player who considers all the options and makes each decision after some careful thought.

When starting a campaign, your warband composition and purchases can have a great impact on your ongoing success. It is just as risky to go with a few models with great equipment as it is to take lots of models with little equipment. After all, with all the perils of Mordheim, it is all too easy for a character to be slain and to be lost forever (along with his equipment). Crippling injuries are also quite possible and can turn a fearsome combatant into a vulnerable opponent in an instant.

Good luck, and remember, shoot first, ask questions later, and if it still moving, club it for good measure!

Below: Martin Wollbaum's Witch Hunter Warband from Golden Demon Germany in 2000

GETTING STARTED

Mordheim: City of the Damned Boxed Game
60011199001

The Mordheim boxed game is the perfect place to start when you're delving into the twisted nightmare that is the City of the Damned. This boxed set contains 8 Human Henchmen, 10 Skaven Warp Hunters, 5 ruined buildings, rules, counters, dice, and the all-important rulebook. This tome not only explains the rules of the game but provides loads of background, hobby tips, and a comprehensive campaign system.

Ten years before the great disaster that would mark Mordheim as a cursed place, the Empire stood on the brink of collapse. The three major powers of Reikland, Middenland, and Marienburg fought for control, each vying for the Emperor's throne. In these dark times, the once glorious Empire of Man was a foreboding and dangerous land, where travelers must be wary, for there are far worse things hiding in the forests and lonely places than mere cut-throats and thieves.

The Empire in Flames is a complete new supplement for the Mordheim game. With it, you can take your conflicts out of the city and into the wilds. The book contains rules sections covering terrain, new equipment, mounted combat, vehicles, new hired swords, new scenarios, and everything you need to make your warbands' fortune in these nightmarish times.

Empire in Flames
60711199019

One of the really fun things about Mordheim is how players can make use of the ruined buildings and scenery in the game. Players can take cover behind crumbling walls or scramble to upper floors to get better shots with their bows. The most daring of warriors can even dive off high balconies to take the enemy by surprise. Not everybody has the time to make his own ruined buildings. That's why we produced *Blood on the Streets*, a building supplement pack for Mordheim.

Mordheim is a little bit of what you might call a tough town, to say the least. The town's reputation as inhospitable at best doesn't seem to deter a rather substantial number of treasure hunters, crusaders, religious zealots, and the occasional adventurous noble from mingling with the locals. Put all of it together, and there are bound to be some who make it to Mordheim but never quite make it out.

Necromunda is a game that allows players to take part in the rival gang wars that occur amid the ruined buildings, gantries, and multi-level walkways of the futuristic Hive cities. Players must not only outmaneuver and outfight opponents on the tabletop but also learn how to equip and expand their gangs. The weak do not survive long in the Underhive.

Battles in the Underhive

Necromunda is a fast-playing and atmospheric game that takes place in the vast and horrible Hive Cities of the future. As a player, you control a gang that seeks riches, powerful weaponry, the wonders of age-old technology, territory, or anything else that will help put you on top of your own corner of the slag heaps and tunnels that make up the Underhives of Necromunda.

This skirmish-level game is heaped with detail, like having your gang members gain skills and experience, run out of ammo at a critical time, climb up ladders, leap off balconies into combat, or hire bounty hunters to assist your missions. The armory lists rules for weapons as well as a full array of useful equipment, like bio-scanners, auto-repairers, bionic eyes, medi-packs, Screammers, and more. The excellent campaign system and scenarios really add a challenge for gangs to live and survive the long haul of the hard life in the Underhive.

The Hives

In the 41st millennium, many planets that were once fair and supported many life forms have been choked and clogged with vast populations and ruinous pollution. Necromunda is just such a planet. The populace, minus vagabond drifters who somehow survive in the Ash Wastes, live in enormous Hives. The Hives of Necromunda tower out of the wastelands like mountains. The vast spires reach above the poisoned cloud cover and pierce the atmosphere. In addition to going upward, these vast Hives spread out and downward to far below the surface.

Built up over thousands of years, the many different Hives sprawl over many levels. Some levels are new, while others hide long-lost technology or mysteries that were better left undiscovered.

The topmost layers of the Hive are spacious, with domes looking down on the clouds. These upper hive dwellers are the rulers of the Hive and of the very planet itself. Nobility, such as it is, dwells on the next lowest levels. Far, far below the cloud level, where the light of the sun is never seen, the Hive City throbs with life crammed into every nook and cranny. Massive industrial complexes,

honeycombed sewers, venting, and air filtration systems spread throughout the cramped and polluted underhive. Here dwell the majority of the people – Hivers, as they are called. Still further down, far below the planet's surface is the Hive bottom, which houses unbelievable horrors that have long been forgotten by those fortunate enough to rise above them. The discharged filth and pollution from all the upper levels eventually finds its way to a putrid lake of radioactive matter called the Sump. Here, at the very base of the spire, dwell the mutant dregs, denizens of darkness and pollution.

Getting Started and Recruiting a Gang

If you are willing to try ruling the Underhive, then you need to recruit a gang. There are four types of gang members: Leaders, Gangers, Heavies, and Juvies. There are minimums and maximums for each type (like the obvious one – you can only have one Leader!), and finding the right mix is a matter of playing style, personal taste, and, of course, the amount of Guilder credits you have. Over the course of a campaign, if you can get your hands on more Guilder credits, you can get better weaponry, new recruits, and replacements for the inevitable casualties that any gang will sustain over many hard-fought battles.

Choosing which gang to get started with is a matter of preference, but you will find all the available Necromunda gangs on the following catalog pages, including Bounty Hunters, Hired Guns, and more. Keep an bionic eye on *White Dwarf* or the Games Workshop web site for news about new gangs and models.

Houses of the Hive City

The Hive City is home to six manufacturing empires known as Houses. The members of these Houses are often drafted into gangs to help defend their House interests and foil the plans of others.

House Cawdor

House Cawdor is the stronghold of the Cult of the Redemption. The Cawdor attitude toward the other Houses is strongly colored by their beliefs. Among other things, their beliefs forbid them to show their faces in public, so Cawdor can be recognized by their elaborate masks, whose designs are often quite bizarre or disturbing. Needless to say, the relationship between House Cawdor and the other Houses is strained.

House Goliath

The domain of House Goliath occupies some of the deepest and harshest areas. These gangers consider the hivers of other Houses to be soft and slack. The other Houses see the Goliaths as barbaric and unpredictable. Size and strength are seen as the measure of a man by the Goliaths. Their style of dress emphasizes a preoccupation with physique.

Hired Guns

From gunslinging Scum and professional Bounty Hunters to psychic Wyrds and psychopathic killers, the Underhive is crawling with those who make a living off the Credits of others. While these hired guns can be very useful, they can also be very treacherous.

Spyrer Hunters

From high in the Spyre, the sons and daughters of the Noble Houses descend in their high-tech rigs to hunt the Underhive populace mercilessly.

House Delaque

House Delaque spies are said to operate throughout the Hive to observe the activities of the other Houses. Their appearance perpetuates their reputation for double-dealing and espionage. They traditionally wear long coats in which they can easily conceal weapons and other large items. Most are very pale and bald headed. Their whispering voices are thin and eerie. Many wear dark visors or implanted filter screens to protect their sensitive eyes – an intolerance to light being a common Delaque weakness.

House Orlock

House Orlock is known as the House of Iron, because its foundations lie upon deep ferrous slag pits. The hivers mine these pits for the debris of ancient times and extract enough pure metal from the refuse to serve their industries.

The Enforcers

Throughout the Hive, Imperial Law is enforced by brutal lawmen. These Enforcers are well armed and armored but suffer from relatively small numbers. As the Underhive is vast, the efforts of the Enforcers serve only to prevent complete anarchy.

Ratskin Renegades

The Ratskin people have lived in the ruins of Underhive for as long as time itself, and Ratskins regard the place as their ancestral home. They know almost nothing about the world that lies above their heads or beyond the hive.

GETTING STARTED

**Necromunda:
Underhive**
60040599011

The *Necromunda: Underhive* rulebook (all 144 pages of it) not only explains the rules of the game – including the vast array of firearms available – but provides loads of background on Necromunda's Hive Primus, pictures of the many gangs you can take, and a comprehensive campaign system.

House Escher

House Escher is perhaps the most strikingly different of all the Houses of Necromunda. Like all the Houses, it is controlled by a ruling family, and its political life and institutions are dominated by close relatives or families in service. However, unlike the other Houses that have reasonably balanced populations, the membership of House Escher is made up almost entirely of women. Escher society has long since developed to cope with its uniquely unbalanced population so that it is no longer perceived as a disadvantage.

House Van Saar

House Van Saar is known for the quality of its technical products. Its technology is no more advanced than that of anyone else, progress being almost nonexistent throughout the Imperium. However, the House's manufacturing processes are precise, and its finished materials are of the highest quality. Like all the Houses of Hive City, the Van Saars have a style of dress that marks them out: a tight fitting body suit designed to protect and sustain the wearer in the hive environment.

The Redemptionists

These religious extremists have been outlawed by the Laws of the Noble Houses. However, the members of the Cult of Redemption can still be found burning and purging throughout the lowest levels of the Underhive among bizarre mutants and the unclean.

WARMMASTER®

Multitudes march to war... Through the smoke and ruin of destruction they advance, an unstoppable army whose ranks spill into the broad plain as effortlessly as the flood tide. You look upon them with the unshakable pride of the indomitable Warmaster.

Warmaster is a game of conflict on a grand scale in the Warhammer world. The scale of the models allows for an abstract rules set and larger, sweeping strategies and tactics. Indeed, it is the general's ability to command that will win the day rather than brute strength or individual heroics. Vast armies of infantry, cavalry, artillery, and monsters are arrayed on the fields of battle, and opposing generals lock wits. Warhammer fans will be thrilled to see their armies and troop types brought to life on a different scale, but the scope of Warmaster makes it a whole new game altogether. Breaking an army's center, destroying the enemy's command and control, and enticing the foe to overextend his battle

line are the "grand level" tactics that are part and parcel of Warmaster.

Bold Sweeping Maneuvers and Mighty Battles

The design theme for the game of Warmaster is plain and simple: big battles. The game firmly places the player in the role of the general making plans, issuing orders, and maneuvering his vast army into an undefeatable position. The emphasis on command control means that it is possible for troops to undertake sweeping flanking moves in a single turn, while other, less fortunate troops just sit back in their Deployment Zone and wait for instructions that never arrive. Certainly, luck plays its part, but a good commander makes use of all the tools at his disposal – heroes, wizards, and others along the chain of command – to issue orders across the far-flung battle lines to make the best luck possible.

To accommodate the grand scale of the battlefield, the models themselves are relatively small. A man is about 10 mm tall compared with a man-sized model

from Warhammer or Warhammer 40,000, which is approximately 28 mm tall. This small size enables the miniature designers to craft most combatants in whole ranks or "strips" that fasten to rectangular 20-mm x 40-mm bases or "stands." Warmaster models are cast in metal, and most are designed to fit onto the plastic bases supplied. A few large models require you to modify the bases or make your own from scratch. In order to distinguish character pieces, many players like to substitute the standard rectangular bases for round bases made from coins or washers. Infantry and cavalry units generally consist of three bases or stands as shown in this catalog. Some units consist of fewer stands, and most large monsters fit onto just one. In all cases, the model range has been designed so that you buy one whole unit at a time. The character sets include a variety of pieces including extra bitz (the designers like doing characters!) but always contain enough pieces to make at least one general, one hero, and one wizard stand. One exception is the Slann Mage-Priest for the Lizardmen. He's so fat that we had to put him in his own pack.

Warmaster models are small, but that doesn't mean that it isn't worth investing a bit of time and effort to make a centerpiece model look extra special. The four examples shown here demonstrate what a talented and very determined modeler can do. A base of characters or troops can incorporate battlefield debris, casualties, or even the odd enemy if you want, and the two Empire character stands are perfectly useable in a game. The marching band and encampment are more display pieces, but it's tempting to invent a scenario that incorporates them!

Right: Mark Harrison's Dwarfen encampment features all manner of Dwarf heroes and characters.

Left: Mark Harrison spent ages clipping out all these Empire drummers to make this huge unit.

Above: Colin Grayson's Empire Wizard and Empire Commander's command stands.

GETTING STARTED

Warmaster Rulebook
66041299001

All of the basic and advanced rules you need to play the game of Warmaster, army lists for six armies, and a painting, modeling, and terrain guide are included in the mighty Warmaster rulebook.

VAMPIRE COUNTS

CLASSIC RANGE

The Range

Games Workshop has grown and developed over our 25 years of existence, and there are many miniature ranges that have been replaced with new models. Most of these "older" models are still perfectly viable with the latest rules sets and army aesthetics and thus are considered "Classic." There are Classic Range models for both Warhammer and Warhammer 40,000.

The term "Collector's" denotes miniatures that are not supported by the current rules or are very old indeed. These models are still sought after by fervent collectors.

Out of Stock

While Games Workshop tries not to run out of stock of any of our products, there are occasionally forces beyond our control. Older models such as those in the Classic and especially the Collector's Ranges may suffer when their molds become worn out. If we cannot repair or replace the molds, then we will retire the model from the available range rather than sell poorly cast figures.

If any models have dropped from availability, updates will be sent to Rogue Trader retailers, Games Workshop Hobby Centers, our Mail Order Division, and our web site. Again, we do not anticipate any such incidents, but over the years, we've learned that it does happen occasionally.

Chaos Creatures

The threat of Chaos is not contained in the Warhammer world or the Warhammer 40,000 universe, and Chaos Creatures can take the field of battle in either setting. Whether they come from the Eye of Terror or the Chaos Wastes, Chaos Creatures can be powerful additions to your army. You will find these models in the final pages of this catalog.

Above: Clan Rat-Fink, the Skaven Horde painted by Gareth Hamilton with a Clan Skryre agent in the safe company of 20 Stormvermin.

Below: Wood Elves defending of a magical cairn is a great subject for a diorama, as they are known for their close ties to the environment. This magnificent piece by David Nelson came in first at the US Golden Demon painting competition in 2000.

Above: Jeppe Danning's Salamander was a little hungry after a tough battle.

Right: One of Jason Meyer's Vampire conversions from the 2003 Minneapolis Grand Tournament in which he won Best Army.

Left: Marike Reimer won second place at the 2003 Los Angeles Golden Demon Painting competition.

Left: Sean Forbes's Daemon Prince uses a mixture of current and classic bitz.

Left: In 1998, Dylan Martin took home a first place trophy from the Australian Golden Demon Painting Competition with this example of just how magnificent Classic Space Marines can look.

WARHAMMER
40,000

WARHAMMER 40,000

CLASSIC RANGE

Left: Some of Jes Goodwin's Harlequins.

Right: Chris Blair's Lictor won the first place award in the Warhammer 40,000 large model category in the '99 Golden Demon competition. This model has many conversions and a highly detailed base.

Below: Victoria Lamb entered Golden Demon Australia 1991 with this heavily converted Praetorian Command HQ.

Bottom: Bruno Rizzo's Ork Command Squad uses a unique combination of classic and standard components to enhance the character of the squad.

WARHAMMER

CLASSIC RANGE

Below: This Dwarf Warrior regiment by Richard Dane was made from a variety of archive and current range models,

Right: Shawn Wagner's 2003 GT army uses a red and white theme instead of the traditional blue and white as shown on this Lothorn Sea Guard. Red has been carried over in his other regiments as well, which helps tie the army together.

Below: This Repanse de Lyonesse earned Tom Weiss the Slayer Sword at the 2000 German Golden Demon competition.

Right: This Chaos Dragon by Jocelyn Goyette won a first place Golden Demon.

If you've seen everything in the current range of miniatures available for Warhammer, Warhammer 40,000, and The Lord of The Rings Strategy Battle Game, then you've still got plenty to see! In this catalog, you'll find all of the models and bitz currently available for the entire line of Specialist Games from Games Workshop, along with an extensive collection of Classic bitz from the worlds of Warhammer and Warhammer 40,000. Crack open the vault and enjoy!

SPECIALIST GAMES RANGE

Fight for survival in an Imperial city, play a bloodthirsty game of fantasy football, command armadas of heavily-armed ships in deep-space combat, and more!

CLASSIC RANGE

Old models never die! They live on in the Classic Range! Inside, you'll find hundreds of bitz no longer available in stores but still incredibly valuable to the hardcore hobbyist.
